

BOROS B4 CS

Fire fighting boots with chainsaw protection.

A revolutionary system

With one pull on the Rosenbauer quick release fastener, the BOROS B4 CS is put on. In the same way, with just one click the central buckle releases the tension from the lacing system, enabling the boot to be removed in a flash. Individual minor adjustments can also be made in two separate areas.

Full freedom of movement, full protection

Despite the flatness of the sole of the foot, people can actually rotate their bent lower leg 360° thanks to their ankle joint. The BOROS B4 CS does justice to this natural mobility with its special flex zone in the ankle area. It allows for natural flexing and leaning movements while protecting against too much strain. This means that the emergency services can enjoy the maximum protection and almost forget that they are wearing boots.

Protection level 3 according to EN 17249

The BOROS B4 CS guarantees protection against chainsaw cuts at protection level 3 in accordance with DIN EN ISO 17249. The boots therefore reliably prevent cuts up to a chain speed of 28 m/s. This ensures maximum safety during use.

Benefits at a glance:

- Excellent customisation
- Extremely simple to operate
- Very quick to pull on and take off
- Lightweight

BOROS B4 CS

Fire fighting boots with chainsaw protection.

What makes BOROS boots different?

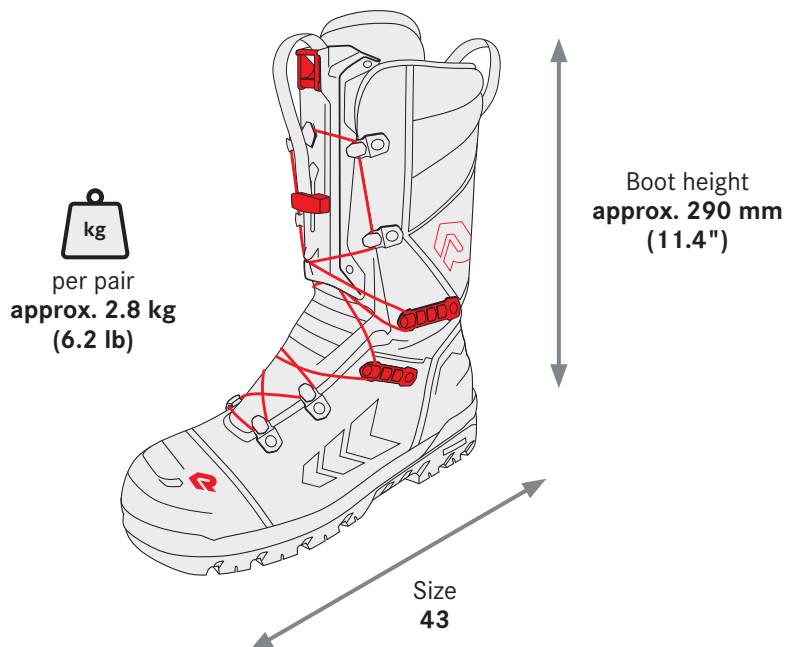

- **Breathable shaft end** to ensure the boot feels pleasant inside
- **Water- and dirt-repellent premium bull hide leather with reflective surface** (reduces the heating up in the sun)
- **Toe and heel caps made from thermoplastic polyurethane (TPU)** protect against wear and tear
- **Optimally dimensioned steel cap** to protect the toes
- **Antistatic composite material** ensures resistance to static electricity
- **Integrated steel anti-perforation protection**
- **3M reflective strips** for increased visibility
- **Ankle protection: special memory foam** around the ankle area for maximum protection against impact
- **Michelin outer sole** for maximum anti-slip protection
- **Pull-off aid** for added comfort when removing the boot
- **Name label** for clear identification
